

ROBOCUP 2004 SYMPOSIUM

The Venue

The conference will be held at the Congress Center of [Instituto Superior Tecnico \(IST\)](#), the School of Engineering of the Technical University of Lisbon. IST is located in the Alameda Afonso Henriques, a few kilometers from the Lisbon airport ([Aeroporto da Portela](#)), and five minutes walking from the closest [subway station](#), Alameda.

The Instituto Superior Técnico (IST)

The Instituto Superior Técnico (IST), created in 1911, is one of the largest and most reputed schools of engineering, science and technology in Portugal.

IST's mission is to contribute to the development of society by promoting a higher education of outstanding quality in the areas of Engineering, Science and Technology, at undergraduate and postgraduate levels, and by carrying out research and development activities in accordance with the highest international standards. Its mission thus reflects the three activities that define the concept of a modern university: Education, Research & Development and Links with Society.

Today IST offers 21 undergraduate programs, attended by more than 8600 students, covering a wide range of areas of knowledge, including not only all the traditional engineering specializations, but also other modern areas such as Biological Engineering, Aerospace and Physics Engineering. Postgraduate training is also important with over 1500 students enrolled in 28 Master programmes, 21 doctoral areas and various specialized courses.

The **Robocup 2004 Symposium** will be held at the **IST Congress Center**, shown in the map below, located at the civil Engineering Pavilion inside IST.
